It is that time of year again! Back to school!

I had a dream of school supplies, where paper clips could talk; where poster paper hung around with marking pens and chalk.

The Stationary idled while the pencils madly raced. The clocks went 'round in circles, and the glue sticks merely paced. The binders were inseparable. They bonded with the tape. The workbooks exercised and helped the stencils stay in shape.

Some calculators added to the numbers in this land, and music was provided by a singing rubber band.

My dream was strange and truly cool, but this was even cooler:

The dictionaries all looked up to me. I was the ruler!

Remember it’s never too early for an Orthodontic evaluation. According to the American Association of Orthodontists, begin no later than age 7 or even earlier if a parent or family dentist discovers a problem. The timing of orthodontic treatment is extremely important and greatly affects the treatment result. Since no two patients are alike, there is not a specific age that is best to begin treatment. **Dr. Pincofski’s orthodontic treatment evaluations are complimentary.** Please feel free to schedule an appointment with our staff.
